CSCI-P465/565 (Software Engineering I)

Meeting Attendees

Prasandeep Singh

Matthew Pletcher

Aravind Bharatha

Angad Beer Singh Dhillon

Raghottam Dilip Talwai

General Meeting Info

Meeting Purpose: Weekly customer meeting

Old Business

Action Item Status:

- Git repository updated.
- User stories on Jira created.
- Project Plan has been prepared.

New Business

Discussions Summary:

- Discussed the feasibility of implementing OAuth using a third party API in the website.
- Discussed the ways of generating test cases. Customer was fine with generating test cases manually for this particular sprint.

Decisions Summary:

- It was decided that Oauth will be implemented for users who want to use their Facebook credentials to create an account and login.
- For users, who don't want to register via facebook, a separate registration page would be created for them.
- Manual test cases would be created to evaluate the functionality of the login and the registration page.

New Action Items:
- All team members will look into implementation of the OAuth and try to complete it by Oct 1st
- Angad will create test cases to check the functionality and prepare the test plan by Oct 1st
- Raghottam will prepare the Design Plan by Oct 1st
- Aravind will update Git repository and Jira stories.
